

High magnetic strength and long life due to Alnico V magnetic cores, fully encapsulated with high-grade PTFE. Strict quality control ensures the magnetic strength, position of the magnetic core, surface quality, crack resistance, and uniform thickness of the PTFE coating.

Rough vessel surfaces or abrasive sediments can quickly deteriorate the PTFE coating and thus shorten the life of stirring bars.

Storing conditions:

to prevent demagnetisation stirring bars using Alnico V magnetic cores should not be stored in a random mass but should be kept "paired" and should not be dropped on hard or steel surfaces.

SPECIFICATION

Core	:	ALNICO V permanent magnet
Material	:	PTFE conforming to FDA and USP Class VI requirements
Max working temperature	:	270°C
Dimensions	:	60x9mm (IMA-01) 40x8mm (IMA-02)
